

EP GAME BIRDS 25 kg

DATASHEET

Version: 01-03-2020

EP Game Birds is a complementary feed produced from rapeseed meal and seaweed fermented with lactic acid bacteria. EP Game Birds contains fermentation metabolites including lactic acid, and contains gut flora stabilizing lactic acid bacteria. The fermentation process ensures a high digestibility of the product and makes the product very suitable for maintaining a healthy and functional gut.

Direction: Use as a complementary feed and place it next to the game birds regular feed. The game birds will self-regulate their feed intake.
