

QUALITY MANAGER FOR FERMENTED FEED

Location: Jelling, Denmark
Full-time

**Do you have experience with quality management of feed?
And would you like to use your knowledge on lacto-fermented
plant protein?**

Then join us and help lead the way as we continue to develop and produce alternative proteins to improve animal health and productivity through gut modulation.

You will be responsible for quality assurance as well as optimising our complementary protein for livestock. The position requires a dynamic, accurate and very self-driven person. In return, the job offers unique opportunities to influence one of the most successful, local and fermented protein producers in today's feed market.

You will be fulfilling a diverse array of tasks related to quality. Your most important job is to ensure the quality of our fermented feed.

Tasks:

- Providing technical data for our portfolio
- Sampling and analysing feed
- Testing new protein sources and fermentation techniques
- Ensuring that we at all times conform with relevant standards
- Carrying out audits from authorities, Quality improvement partners like HACCP, GMP+ and customer audits
- Optimising feed formulations and production in collaboration with our R&D department
- Giving technical support for customers and sales managers
- Participation in scientific articles, projects and grants, where travelling is sometimes required

Desired background

You probably studied Agriculture at University, but we are open to other relevant educational backgrounds related to food and feed. Most importantly, you have substantial Quality Management experience from the feed industry. It is an advantage, but not a requirement that you have experience with fermentation.

Why work for European Protein?

European Protein is a family-owned business, where the employees' health and happiness are considered fundamental keys for the company's success. We support balanced family lives via flexible hours and working from home.

At European Protein, we have a low hierarchy and lean organisation, enabling us to quickly adjust to the market needs. This bottom-up approach requires a lot of self-management and drive from our employees and you - if you decide to join us.

We offer a favourable salary package with pension and health insurance. All employees participate in financial profit sharing.

The job is full-time. You will be working from our factory site in Jelling sharing offices with our production team leader and the production team while coordinating with the administration in Bække, and the R&D department in Copenhagen. Participation in grants and customer meetings do require minor travelling activity.

Are you interested?

Please send your CV and motivated application to job@europeanprotein.com. Interviews are held as we receive relevant applications, so make sure to send yours right away.

If you want to know more about the position, you are welcome to contact: CEO, Jens Legarth, Phone: +45 23 34 93 34, Mail: jel@fexp.eu

About European Protein

European Protein is an innovative producer of health-promoting feed for animals. The company's patented fermentation process makes complementary proteins that increase the animals' gut health and productivity, ensuring that healthy animals are a healthy business for the farmer.

European Protein is a family-owned company located in Denmark with additional production facilities in Ukraine and the US. Farmers can buy the feed directly or through the company's distribution network.
