

DATASHEET

Version: 05.10.2022

EP100i is a complementary feed produced from rapeseed meal fermented with lactic acid bacteria. EP100i contains fermentation metabolites including lactic acid and contains gut flora stabilizing lactic acid bacteria. The fermentation process makes the product suitable for maintaining a healthy and functional gut.

EP100i can be used for up to four weeks as a dietary feed to stabilise digestive disturbances in case of risk of, during periods of, or recovery from digestive disturbance*. EP100i should not exceed inclusion beyond 20% of the complete feed.
